Village Water Customer  
Swanton, VT

RE: Lead Service Line Inventory

Dear Village Water Customer,

We would like to thank everyone for their cooperation in completing our State mandated Lead Service Line Inventory of our water system. With your help, we were able to verify 100% of customers service line materials through survey responses or date of construction information from the Listers Office.

A small number of structures were determined to have lead or the type of galvanized connections needing replacement. Those property owners have been notified and line replacements will be coordinated in the spring of 2025. We have provided those customers with important information on ways to stay safe from lead exposure until replacements can be made. That information is posted with this notice and is also available at the Municipal Office by contacting Heidi Britch-Valenta at 802-868-3397 x 241 or [hbvalenta@swanton.net](mailto:hbvalenta@swanton.net). You can also learn more about the Lead Service Inventory project by visiting the ANR Water Division website <https://dec.vermont.gov/press-release/vermont-inventory-public-drinking-water-systems-lead-service-lines> or at the Vermont Department of Health's website <https://www.healthvermont.gov/environment/drinking-water/lead-drinking-water> .

Thank you again for your cooperation and we will share more information on this project as it becomes available.

Sincerely,

William Sheets

Swanton Village Manager
